NEW ELECTRIC MOTOR DEVELOPED; MACHINE-TRACTOR STATICES ESTABLISHED

NEW ELECTRIC MOTOR -- Prace, No 62, 15 Mar 49

The Mached factory workers of the Moravian Electrotechnical Factories have developed a single-phase electric motor of special construction which will replace the old type of motor used in refrigerators, keeping the same specifications. Three-phase motors have generally been made up till now and then converted into single-phase motors to meet requirements of refrigerators.

The new motor will mean a saving of 88.40 crowns per motor. The greatest advantage of this motor, however, is the fact that it will mean a saving of 0.67 kilograms of copper per motor.

The plan new is to produce 15,000 of these motors this year, at a saving of 10,050 kilograms of copper and 1,326,000 crowns.

MENDLE FACTORY PLEDGES GIFT TO REPUBLIC -- Prace, No 65, 18 Mar 40

Workers of the Igla state enterprise in Ceske Budejovice, the only needle factory in Czechoslovakia, have pledged to construct a degressing machine as a gift to the Republic. The machine is 60-percent completed. They also riedged to build four new production lines for all sorts of needles. These are to increase production from 18 to 32 percent and have been completed. A fifth line will be put into operation this week. The first line showed a 37-percent increase in output. The development work on polishing 0.27-millimeter points is also completed. These are the smallest points polished in Czechoslovakia.

MACHINE-TRACTOR STATIONS IN PRESOV KRAJ -- L'ud, No 63, 16 Mar 49

State machine-tractor stations have been established in seven ourse of Presor Eraj. Stations are to be established in the remaining obres not later
